Japesh Babbar

Student at GGSIPU

japeshbabbar63@gmail.com 7015436700 Delhi, India Github LinkedIn leetcode

EXPERIENCE

Coordinator 09/2025 – Present
IEEE GTBIT Student Branch
- Coordinated technical event planning and execution with student teams. Add event count or attendance if known.

EDUCATION

Bachelor of Technology in Computer Science Engineering 08/2025 – 08/2029
Guru Tegh Bahadur Institute of Technology (GGSIPU)

Science 06/2023 – 05/2025
Chaudhary Baldev Singh Model School Delhi
Class 12th from Science

SKILLS

Languages
C++, Python, JavaScript

Core
Data Structures & Algorithms, OOP ,DBMS

Tools
Git, GitHub, Jupyter Notebook

Web Development
HTML, CSS, React.js, Node.js

Libraries & Frameworks
NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn

ACHIEVEMENTS & ACTIVITIES

- **Problem Solving:** Solved 200+ coding problems across programming platforms.
- **Smart India Hackathon (SIH) 2026:** Qualified through the internal selection round of Smart India Hackathon 2026.
- **Vihaan 9.0, DTU:** Participated in the hackathon; developed RECTIF-AI.
- **Hacktoberfest 2026:** Participated in the open-source contribution initiative.
- **Xploit, Xpecto'26, IIT Mandi:** Participated in the technical event.

PROJECTS

Loan Prediction System using Machine Learning
- Performed Exploratory Data Analysis (EDA) using count plots, box plots, pie charts, bar graphs, and violin plots.
- Identified key insights such as class imbalance, income distribution, credit history importance, and loan amount outliers.
- Built and trained multiple models: Logistic Regression, Decision Tree, and Random Forest.
- Evaluated performance using Accuracy Score and Confusion Matrix.
- Implemented using Python, Jupyter Notebook, and Scikit-learn.

RECTIF-AI | AI-Powered Document Verification Engine
Python, EasyOCR, PyTesseract, RapidFuzz, FastAPI, Gemini API
- Engineered a document-processing pipeline integrating OCR, document classification, regex-based extraction, and cross-document identity validation.
- Built validation logic using fuzzy string matching to flag potential name inconsistencies across identity and property documents.
- Developed document-compliance checks for selected property-registration rules and identity-document formats, with verification flags and a downloadable PDF report.
- Integrated a Gemini-powered assistant and generated synthetic document samples to support development and testing without relying exclusively on real personal data.
